BatchMaster ERP with Sage 50/100/200/300

Process manufacturing businesses cannot rely solely on their existing accounting software package such as Sage 50/100/200/300, as it can result in disjointed and inefficient operations. The task of managing the complex supply chain operations requires a comprehensive ERP solution that can streamline all business-critical processes. However, is it possible to achieve process-manufacturing-centric capabilities without sacrificing their long-used financial software?

Now streamline supply chain operations, while keeping your accounting software

Fortunately, BatchMaster ERP seamlessly integrates with Sage 50/100/200/300 to create a powerful platform that simplifies managing formulation, batch processing, material planning, inventory, sales, and purchase, while handling the accounting- and finance-related transactions with equal ease. With the smooth, and real-time integration between the two software, manufacturers can ensure that their accounting information is interconnected with their critical supply chain processes, resulting in a more efficient and streamlined business.

With the integration between the AP, AR, and GL of BatchMaster ERP and Sage 50/100/200/300, managing the distribution, manufacturing, quality, compliance, and financial aspects of an organization is more manageable. In addition to streamlining business operations and improving financial management, this integration also provides enhanced visibility and reporting capabilities, allowing for better decision-making and strategic planning based on accurate, up-to-date information.
